SUMMARY

Assistant System Engineer at Tata Consultancy Services (TCS) writing SQL and resolving database issues for SBI YONO 2.0 product support, targeting Data Analyst, Data Engineer and Product Analyst roles. Brings product analytics judgment from 14 months on enterprise fintech platforms: Key Performance Indicators (KPIs), funnel drop-off analysis and A/B testing across 3 financial modules. B.Tech in Computer Science (Data Science).

SKILLS

Analytics: SQL (joins, window functions, CTEs), MySQL, Python, Pandas, NumPy, Scikit-learn, Advanced Excel, exploratory data analysis (EDA)
Product analytics and BI: KPI reporting, funnel analysis, A/B testing, Power BI, stakeholder management
Data engineering: ETL (Extract, Transform, Load), ELT, data modeling, data warehousing
Big data and cloud: Apache Spark, Hadoop, Kafka, Databricks, Snowflake, Google BigQuery, Azure
Tools: Java, Git, JIRA, Agile

EXPERIENCE

Assistant System Engineer | Tata Consultancy Services (TCS) | June 2026 - Present

- Support SBI YONO 2.0, SBI's digital banking platform, as part of the product support team: write and optimize SQL queries and investigate database issues to keep production workflows running.
- Practice Apache Spark, Databricks, Snowflake, Kafka, Hadoop and BigQuery on public datasets, building ELT pipelines and Power BI dashboards (in progress).
- Delivered backend (Spring Boot) and frontend (Angular) features for HealthSphere, an end-to-end healthcare application.
- Completed ILP training across 7 technologies (Java, Spring Boot, Angular, REST APIs, HTML, CSS, JavaScript) plus a Generative AI competency.

Experience Design Professional (UX and Product) | THEM Consulting Pvt Ltd. | April 2025 - May 2026

- Redesigned ICICI Corporate Banking B2B workflows used by enterprise clients such as Tech Mahindra and L&T, targeting faster task completion and higher transaction accuracy.
- Diagnosed user drop-off across 3 financial modules (Trade, Invest & Insure) and tracked KPIs to decide which fixes to prioritize.
- Validated design decisions through A/B tests and usability testing, and prepared User Acceptance Testing (UAT) documentation.
- Aligned stakeholders at 2 organizations (ICICI, Infosys) by translating Business Requirements Document (BRD) inputs into delivered designs.

PROJECTS

Instagram User Analytics | SQL, MySQL Workbench | Project link

- Analyzed Instagram user data in MySQL to reward the 5 oldest users, identify inactive users, detect bots, evaluate hashtag performance and measure ad campaign effectiveness.

Multi-Layered Defense Architecture for DDoS Protection | Python, CNN, Random Forest, Azure | Project link

- Designed a real-time, multi-tier Distributed Denial of Service (DDoS) defense for private clouds on Azure, integrating CNN-based C2C detection, traffic scrubbing and an Intrusion Detection and Prevention System (IDPS); achieved over 95% packet drop rate at under 150 ms latency.

Quora Sincere Question Classification | Python, BERT, Scikit-learn | GitHub, Project summary

- Built a Natural Language Processing (NLP) model with Google's BERT to predict question sincerity on a dataset of 1.3 million+ rows, and published the approach in a Medium write-up.

EDUCATION

Bachelor of Technology, Computer Science Engineering (Data Science)
Dr. A.P.J. Abdul Kalam Technical University, Lucknow | 2021 - 2025

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI-900), scored 850/1000 - Microsoft Learn credential
- Complete A.I. and Machine Learning, Data Science Bootcamp, Udemy - Udemy certificate

AWARDS AND RESEARCH

- Won 1st Position at the AICTE Innovation, Design and Entrepreneurship Bootcamp (2024) and HackOverFlow, IIT Jodhpur (250+ teams, 2022); placed 2nd at UPES Hackathon 8.0 (500+ teams, 2024); Smart India Hackathon finalist, top 5 of 100,000+ students (2023).
- Presented 3 research papers at international conferences, including Social Design with ICT for Sustainability (IIT Bombay) and Biometric and IoT Voting Security (IEEE).
